## **The New DHS National Terrorism Advisory System Bulletin: A Conversation with John Cohen**

This week, the U.S. Department of Homeland Security released its National Terrorism Advisory System (NTAS) Bulletin to the public. The NTAS Bulletin provides a quarterly summary of evolving terrorism threats to the U.S. homeland. The latest Bulletin highlights the convergence of several key factors that have increased the volatility, unpredictability, and complexity of the heightened threat environment today.

## **Bluetooth Tracking Devices - What are they and how are being used for nefarious acts**

Criminals are placing Bluetooth trackers in vehicles they want to steal, people they want to stalk, or people they want to track for some other suspicious activity. Bluetooth trackers, easily concealed, have been discovered behind license plates, between and underneath car seats, and in personal items carried by unsuspecting victims. Check out the resource below for further information and how to protect yourself.
