### **Cyber Attacks In The Legal Sector - What To Look Out For**

Whilst you may be able to restore your data from backups it is too late to stop the data from getting into the hands of criminals and potentially into the public domain.

Although larger firms are not immune, smaller firms who may have lower cyber security maturity are ones who are mainly being exploited, companies with 1K or fewer employees represent 81 percent of attacks.

### **Cybersecurity 101 Introduction to Cybersecurity**

Our dependence on the internet, corporate networks, and digital devices have far exceeded what was even imaginable only a few decades ago. Governments, corporations big and small, and individuals the world over rely on interconnected digital systems and technology for every aspect of their commerce, finance, and communication.

The challenge of securing personal information, intellectual property, and critical data has increased in parallel to our use of and dependence on technology.
