LOCKED OUT! Detecting, Preventing, & Reacting to Human Operated Ransomware

Human Operated Ransomware (HORA) threat groups are growing in number and strength every day. In this Webcast, SANS Instructor Ryan Chapman will cover the evolution of, tactics inherent to, and threats associated with HORA. Ryan will provide "quick wins" that you can implement now to protect yourself against this ugly threat. Ryan will also focus on what to do if ransomware is running *right now*, along with what to do when ransomware has run and the outlook is bleak. Ryan will wrap up the Webcast with a list of digital forensics and incident response tools that work well within on-prem and cloud-based environments alike. Are you and your company prepared for this looming threat?

Top Cybersecurity Challenges Facing Healthcare Providers

With the surge in ransomware and other major hacking incidents affecting third-party suppliers, it is more critical than ever for healthcare sector entities to diligently scrutinize threats and risks involving their vendors, says Denise Anderson, president and CEO of the Health Information Sharing and Analysis Center.
