Cyber Insights 2023 | Supply Chain Security

The supply chain threat is directly linked to attack surface management (it potentially represents a hidden part of the attack surface) and zero trust (100% effective zero trust would eliminate the threat). But the supply chain must be known and understood before it can be remediated.

Four ways to maximize a cybersecurity budget

Global cyberattacks surged 42% in the first half of 2022 compared to 2021, per Check Point research. Attacks grew by 28% in the third quarter alone when weighed against the same period last year. All of this translates to one thing: financial damage — and lots of it.
