Cybersecurity Performance Goals: Sector-Specific Goals

Now that the cross-sector CPGs have been published, CISA is working with Sector Risk Management Agencies (SRMAs) to directly engage with each critical infrastructure sector to develop Sector-Specific Goals (SSGs). In most instances, these goals will likely consist of either new, unique additional goals with direct applicability to a given sector, or, materials to assist sector constituents with effective implementation of the existing cross- sector CPGs

Building the Right Collective Defense Against Cyberattacks for Critical Infrastructure

As an increasing range of cyberattacks threaten to compromise industrial controls, take safety systems offline and interrupt critical services like electricity and water, the cybersecurity challenges facing critical infrastructure are too great for any one organization to solve alone. Industrial systems have become more connected and digitized, and our adversaries have learned to weaponize the very systems that support society to instead threaten human health and life at scale.
